**Delaware Health Requirements for Poultry Shows**

All exhibitors must show proof that poultry originated from a Pullorum-Typhoid-Free Flock and any breeder birds have been tested negative for Pullorum-Typhoid within one year.

A random test of ten (10) birds per flock shall be tested negative for Avian Influenza by PCR, within twenty one (21) days of the show. Testing must be done by a state or federally approved laboratory. If an exhibitor has less than ten (10) birds in their flock, all birds shall be tested for AI. This requirement is for both in state and out of state birds.

All birds shall be accompanied by a USDA VS Form 9-2, or similar paperwork, indicating owner's name and address, flock location, breeds tested, and verification of the above negative test results and dates of tests.

Exhibitors with flocks on a 180 day U.S. NPIP Avian Influenza-Clean Flock Program are exempt from the 21 day requirement. For these flocks, proof of negative tests and the last two test dates shall accompany birds to the show.

All birds will be inspected for general health upon presentation. Any birds showing clinical signs of any contagious or infectious disease will be removed from the show.
